Portfolio

Project Sidelined - Dynamic React powered full stack application partnered with ExpressJS for the backend. React and Redux are used to handle various stateful components and vital information. Express and RESTFUL API store the save state of user content.

Comment Moderator Simulator - A full stack form style application which empowers the user to moderate, modify, and delete comments from a thread. The front end interface offers a simple and easy to read blog information. GET and POST request are communicated to the backend to allow for dynamic forum moderation.

Project Pokemon - Build an awesome web application as a group! Mix and match libraries and APIs to build a useful front-end web application.

Work Experience

Reverse Mortgage Solutions | First Legal Specialist   October 2018 - Present
- Manage active foreclosure portfolio of 400+ loans.
- Serve as the first point of contact for attorney firms and vendors.
- Maintain active review of the accounts for issues, document request, document execution, and fee request to expedite the foreclosure process.
